	EYFS	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Working Scientifically	Understanding the World (The World) Children know about similarities and differences in relation to places, objects, materials and living things. They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.	asking simple questions and recognising that they can be answered in different ways observing closely, using simple equipment performing simple tests identifying and classifying using their observations and ideas to suggest answers to questions gathering and recording data to help in answering questions	asking simple questions and recognising that they can be answered in different ways observing closely, using simple equipment performing simple tests identifying and classifying using their observations and ideas to suggest answers to questions gathering and recording data to help in answering questions	 asking relevant questions and using different types of scientific enquiries to answer them setting up simple practical enquiries, comparative and fair tests making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers gathering, recording, classifying and presenting data in a variety of ways to help in answering questions recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions identifying differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer questions or to support their findings. 	 asking relevant questions and using different types of scientific enquiries to answer them setting up simple practical enquiries, comparative and fair tests making systematic and careful observations and, where appropriate, taking accurate measurements using standard units, using a range of equipment, including thermometers and data loggers gathering, recording, classifying and presenting data in a variety of ways to help in answering questions recording findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables reporting on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions using results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions identifying differences, similarities or changes related to simple scientific ideas and processes using straightforward scientific evidence to answer questions or to support their findings. 	planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs using test results to make predictions to set up further comparative and fair tests reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations identifying scientific evidence that has been used to support or refute ideas or arguments.	• planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary • taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate • recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs • using test results to make predictions to set up further comparative and fair tests • reporting and presenting findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations • identifying scientific evidence that has been used to support or refute ideas or arguments.
Plants	They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.	Animals, • identify and name a variety of common wild and garden plants, including deciduous and evergreen trees • identify and describe the basic structure of a variety of common flowering plants, including trees.	observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	• identify and describe the functions of different parts of flowering plants: roots, stem/trunk, leaves and flowers • explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant • investigate the way in which water is transported within plants • explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed	• recognise that living things can be grouped in a variety of ways • explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment • recognise that environments can change and that this can sometimes pose dangers to living things.	describe the life process of reproduction in <u>some</u> plants and animals.	describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals give reasons for classifying plants and animals based on specific characteristics.
Animals	They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.	• identify and name a variety of common British animals that are birds, fish, amphibians, reptiles, mammals and invertebrates • identify and name a variety of common animals that are carnivores, herbivores and omnivores • describe and compare the structure of a variety of common animals (birds, fish, amphibians, reptiles, mammals and invertebrates, and including pets)	know that animals, including humans, have offspring which grow into adults describe the basic needs of animals, including humans, for survival explore and compare the differences between things that are living, dead, and things that have never been alive	dispersal. • identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat • identify that humans and some animals have skeletons and muscles for support, protection and movement.	construct and interpret a variety of food chains, identifying producers, predators and prey.	describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird describe the life process of reproduction in some plants and animals.	describe the ways in which nutrients and water are transported within animals, including humans.

Humans	Physical Development (Health and Self-Care) Children know the importance for good health of physical exercise, and a healthy diet, and talk about ways to keep healthy and safe. Children know about similarities and differences in relation to places, objects, materials and living things.	• identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense	know that animals, including humans, have offspring which grow into adults describe the basic needs of animals, including humans, for survival describe the importance for humans of exercise, eating the right amounts of different types of food, and hygiene.	identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat identify that humans and some animals have skeletons and muscles for support, protection and movement.	describe the simple functions of the basic parts of the digestive system in humans identify the different types of teeth in humans and their simple functions	Describe the changes as humans develop from birth to old age. • describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird Learning Challenge Curriculum links (PSHE): Puberty discussions – changes in boys and girls – School nurse. Links with Year 6	describe the ways in which nutrients and water are transported within animals, including humans. recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood Learning Challenge Curriculum links (PSHE): Effects of drugs and alcohol on the human body/mental health. Effects of exercise to combat obesity level in children.
Habitats	They talk about the features of their own immediate environment and how environments might vary from one another. They make observations of animals and plants and explain why some things occur, and talk about changes.		identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other identify and name a variety of plants and animals in their habitats, including micro-habitats describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.		recognise that living things can be grouped in a variety of ways explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment recognise that environments can change and that this can sometimes pose dangers to living things.		describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences, including microorganisms, plants and animals
Food Chains	They talk about the features of their own immediate environment and how environments might vary from one another.		describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.		recognise that living things can be grouped in a variety of ways explore and use classification keys to help group, identify and name a variety of living things in their local and wider environment construct and interpret a variety of food chains, identifying producers, predators and prey.		• give reasons for classifying plants and animals based on specific characteristics.
Rocks				compare and group together different kinds of rocks on the basis of their appearance and simple physical properties describe in simple terms how fossils are formed when things that have lived are trapped within rock recognise that soils are made from rocks and organic matter. Learning Challenge Curriculum links (History): Stone Age, Iron Age and Bronze Age topics.			
Inheritance							• recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents
Evolution							• recognise that living things have changed over time and that fossils provide information about

							living things that inhabited the Earth
Adaptation							
			Every day	materials			
Materials	Children know about similarities and differences in relation to places, objects, materials and living things.	distinguish between an object and the material from which it is made identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock describe the simple physical properties of a variety of everyday materials compare and group together a variety of everyday materials on the basis of their simple physical properties.	• identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses			• compare and group together everyday materials based on evidence from comparative and fair tests, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets • give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic	
Solids, liquids and gases		properties.	• find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching.		compare and group materials together, according to whether they are solids, liquids or gases	use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating	
Changing states					• observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C) Learning Challenge Curriculum links (Geography): Water Cycle	• know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution Cross curricular links (Geography) – The Amazon Rainforest.	
Reversible and irreversible reactions					• identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature.	demonstrate that dissolving, mixing and changes of state are reversible changes explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the action of acid on bicarbonate of soda.	

		Light and	d Sounds			
Light sources and properties	 observe changes across the four seasons observe and describe weather associated with the seasons and how day length varies Cross curricular links (PSHE) – sun safety 	Cross curricular links (PSHE) — sun safety	recognise that they need light in order to see things and that dark is the absence of light notice that light is reflected from surfaces recognise that light from the sun can be dangerous and that there are ways to protect their eyes Cross curricular links (PSHE) – sun safety	Cross curricular links (PSHE) – sun safety	Cross curricular links (PSHE) – sun safety	recognise that light appears to travel in straight lines use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes Cross curricular links (PSHE) — sun safety
Shadows			 recognise that shadows are formed when the light from a light source is blocked by an opaque object find patterns in the way that the size of shadows change. 			• use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them.
How sounds are made			Learning Challenge Curriculum links (music): Music School instruments – children learning 3 instruments over the year.	identify how sounds are made, associating some of them with something vibrating recognise that vibrations from sounds travel through a medium to the ear		
Pitch			Learning Challenge Curriculum links (music): Music School instruments – children learning 3 instruments over the year.	• find patterns between the pitch of a sound and features of the object that produced it		
Volume			Learning Challenge Curriculum links (music): Music School instruments – children learning 3 instruments over the year.	find patterns between the volume of a sound and the strength of the vibrations that produced it recognise that sounds get fainter as the distance from the sound source increases.		
	F	orces and	electricity			
Magnets and types of forces			• notice that some forces need contact between two objects, but magnetic forces can act at a distance • observe how magnets attract or repel each other and attract some materials and not others • compare and group together a variety of everyday materials on the basis of whether they are attracted to a magnet, and identify some magnetic materials • describe magnets as having two poles • predict whether two magnets will attract or repel each other, depending on which poles are facing.	• Identify common	explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object identify the effects of air resistance, water resistance and friction, that act between moving surfaces recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect.	• Associate the
Circuits				Identify common appliances that run on electricity. Cross Curricular link (History) – use of candles and fire for light sources.		Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit Use recognised symbols when

			Construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers. Identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery. Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit.	representing a simple circuit in a diagram. • recognise that light appears to travel in straight lines
Conductors and insulators			Recognise some common conductors and insulators, and associate metals with being good conductors.	• Compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches
